Evaluation schedule

Please open the link of the survey, fill out the questionnaire and send your information by **clicking on "Submit".**

Please interpret the questions in the context of this semesters' special teaching/learning situation and tick "no statement" if in doubt.

Information about processing and transfer of the data

- The survey is anonymous and the data is evaluated and published so that no conclusions on individual data are possible.
- The results of the survey are evaluated by QUIKKS (SLI). Then they are usually reported back to the lecturers within three day for discussion in class.
- If the number of participants is <4, there should be no evaluation. In addition the teachers will not receive an evaluation if there are <4 completed surveys.
- The evaluation results of the individual courses will not be forwarded to the University management. Only the lecturers themselves, the respective dean's office and the institutions involved in the survey (studiumdigitale, QUIKKS / SLI) will get access to the evaluation data.
- The further use of their aggregated LVE reports is possible for teachers (including for qualification procedures, performance evaluation, etc.).
- The evaluation procedure is in adherence with the privacy policy of the Goethe University.
